

2021 Spring Series 3M Skin and Wound Care Virtual Workshops

We are pleased to announce the spring series of 3M's industry leading Skin and Wound Care Workshop Education in virtual format. You are invited to join us for educational and interactive live workshop sessions covering a wide range of skin and wound care best practices.

April 13, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/7913442883328652815>

Skin and Wound Care Virtual Workshop Series Session One: Wound Assessment

Objectives:

- Identify and understand the key components involved in wound assessment and documentation
- Understand the importance of wound bed preparation and the factors involved

April 15, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/5635794650787133710>

Skin and Wound Care Virtual Workshop Series Session Two: Prevention and Management of Skin Tears

Objectives:

- Discuss prevention and management strategies for skin tears based on international best practice guidelines
- Identify the form and functions of advanced wound dressings for treatment of skin tears
- Identify the form and functions of professional skin care products for treatment of skin tears

April 27, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/823695150407446030>

Skin and Wound Care Virtual Workshop Series Session Three: MASD: Understanding the problem. Creating the solution.

Objectives:

- To understand moisture associated skin damage (MASD) as it relates to various etiologies
- Describe key factors that contribute to the development of MASD
- Describe the evidence base for care of MASD
- Describe key interventions for prevention of MASD

April 29, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/1067861498627047949>

Skin and Wound Care Virtual Workshop Series Session Four: Prevention and Management of Pressure Injuries

Objectives:

- Review of wound bed preparation, signs and symptoms of a wound infection
- Identify categories of wound dressings and professional skin care products that may be used to prevent and treat pressure injuries
- Discuss pressure injury prevention and treatment as they relate to the international guidelines

May 4, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/3393013031536800523>

Skin and Wound Care Virtual Workshop Series Session Five: Lower Limbs Management

Objectives:

- Identify and understand risk factors for lower limb ulcers and edema
- Discuss management strategies for edema and lower leg ulcers (VLUs, DFUs)
- Identify the form and functions of compression wrapping for edema management

May 6, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/3720313453804708111>

Skin and Wound Care Virtual Workshop Series Session Six: Wound Infection vs Inflammation: Assessment and Treatment

Objectives:

- Understand the clinical differentiation between wound infection vs inflammation
- Understand the acronym NERDS and STONES and how they relate to superficial and deep infections
- Discuss the 3M product solutions for these wounds

May 11, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/8243275480940807695>

Skin and Wound Care Virtual Workshop Series Session Seven: Introduction to Negative Pressure Wound Therapy

Objectives:

- Examine the difficulties wounds present in the lives of patients
- Review steps to take in creating a comprehensive treatment plan to promote wound healing
- Understand the science behind negative pressure wound therapy (NPWT)
- Review the evidence of NPWT

May 12, 2021 at 2 pm ET

Register for this session at: <https://attendee.gotowebinar.com/register/5050608174264388878>

Skin and Wound Care Virtual Workshop Series Session Eight: Proactive Wound Management*

Objectives:

- Examine why the best wound care approach might be a proactive one
- Review the benefits of negative pressure wound therapy (NPWT) and the published data on early vs late initiation of NPWT
- Explore the role that collagen and oxidized regenerated cellulose (ORC) can play in managing inflammation

*It is strongly encouraged that attendees attend the "Introduction to Negative Pressure Wound Therapy" session on May 4, 2021 prior to attending this education event, as this session requires an understanding of negative pressure wound therapy.
